SUBJECT: Illinois / TDD #F5-8009-8  
Illinois Eckhardt Report  
Rockdale / M&W #2

A Preliminary Assessment form (USEPA form T 2070-2) and a Site Inspection Report (USEPA form T 2070-3) have been completed for the subject site. This site was listed on the Illinois Eckhardt Report and has been researched pursuant to TDD #F5-8009-8.

In reviewing the information obtained from Illinois EPA, it is our opinion, based upon this information and an on-site inspection, that a low priority be given to this site. The factors which determined this decision are as follows:

- The inactive status of the site for the past two years
- Routine monitoring and surveillance by IEPA
- Construction of a building on the southern edge of the fill area
- Excavation of the fill area in early 1980 as part of sand and gravel mining operation

From this information, it is recommended that no further action be taken.
